AD - 10	Agricultural and Veterinary Chemicals Code Act 1994	<p>An agricultural chemical product for the purposes of the Code is a substance or mixture of substances that is represented, imported, manufactured, supplied or used as a means of directly or indirectly -</p> <ul style="list-style-type: none">• destroying, stupefying, repelling, inhibiting the feeding of or, preventing infestation, by or attacks of, any pest in relation to a plant, place or thing; or• destroying a plant; or• modifying the physiology of a plant or pest so as to alter its natural development, productivity, quality or reproductive capacity; or• modifying the effect of another agricultural chemical product; or• attracting a pest for the purpose of destroying it. <p>The Code provides for the approval by the Australian Pesticides and Veterinary treatment (formerly known as the National Registration Authority for Agricultural and Veterinary Chemicals), of the active constituents of a chemical product, and the approval of labels containing chemical products, and the registration of chemical products. The Code also regulates or prohibits the possession of unapproved constituents and unregistered products for the purposes of supply and the supply of approved constituents or registered products in contravention of the conditions of their approval or registration. The Code does not control the “end use”, as such, of agricultural chemicals, and hence would be unlikely to have a direct effect on Atlantic Group operations. Nevertheless, it would be prudent for Atlantic Group to use only agricultural chemicals that have been approved and registered under the Code in its operations. The use and disposal of chemicals is dealt with by the Agricultural and Veterinary Products (Control of Use) Act 2002, which is dealt with in the following paragraph.</p>	Legislation	Joe Smith	Active
